

# Pokevengers

“Before creation itself there were six singularities”

## Introduction :

This game would be mashup of characters from Pokemon & Avengers with the **story line from Avengers - Infinity war**. Thanos goes on to collect all the infinity stones from various places around the universe battling against the mightiest super heros, okay fine then **Thanos be my superhero** & he will be the lead character of the game. PV will have some of the traits borrowed from PokemonGo. **The characters are designed such that both the Avenger & Pokemon character matches in some ways such as that they match in resemblance / power / gender.**

The game will be of 2 modes,

- A. 1 vs 1
- B. Adventure

The former will be a one shot match against the AI / another player whose code has to be nearby (PokemonGo) wherelse adventure mode will be the content of this document.

The ultimate aim of the game is to find the six stones. **Which Pokemon to combine with Thanos rather than the “Mighty Meowto”**. I’m also including the planet from which he got the gauntlet here, it is not shown in the movie, but let's create this. The below table lists down the places from where Thanos got the six stones,

## Stone vs Place :

Stone / Gauntlet	Place
Gauntlet	Nidavellir
Power stone	Xander
Space stone	Galaxy
Reality stone	Knowhere
Soul stone	Vormir
Time stone	Titan
Mind stone	<b>WAKANDA</b>

Thanos goes to each place & has a fight with the characters. So we need to know which characters to fight against our hero,

## Place vs Characters :

Place	Character
Nidavellir	Eitri
Xander	Nova Corps - Intergalactic police force
Galaxy	Thor, Loki, Heimdall, Hulk

Knowhere	Drax, Starlord, Gamora, Mantis
Vormir	Gamora - sacrifice
Titan	Ironman, Starlord, Spiderman, Dr. Strange, Drax, Mantis
Wakanda	Captain America, Black Panther, Hulk, Thor, Black widow, Bucky Barnes, Clint, Groot, Rocket, Scarlet witch

Hence all the splits are done, let's choose the Pokemon mashup character for our Avengers. We have decided on only a few and more are yet to come.

### **Avenger vs Pokemon :**

<b>Avenger</b>	<b>Pokemon</b>
Thor	Pikachu
Loki	Ditoo
Hulk	Machomp
Iron man	Charizard
Groot	Sudowoodo
Scarlet witch	Jigglypuff
Captain America	Squirtle
Black Panther	Ghastly

The rest of the pokemon mashups will be done soon.

**Note :** The stone's can't be kept in hand, that's the reason being the stones are kept in sceptre in case of space stone, time stone in a medal & Thanos using gauntlet to house the stones. So let's keep the stones inside an egg(PokemonGo) inspired. Once our hero Thanos fought & has eliminated the enemies, the stone has to be retrieved by throwing a pokeball & getting it. Similar to below replace the Pokemon with the stone,

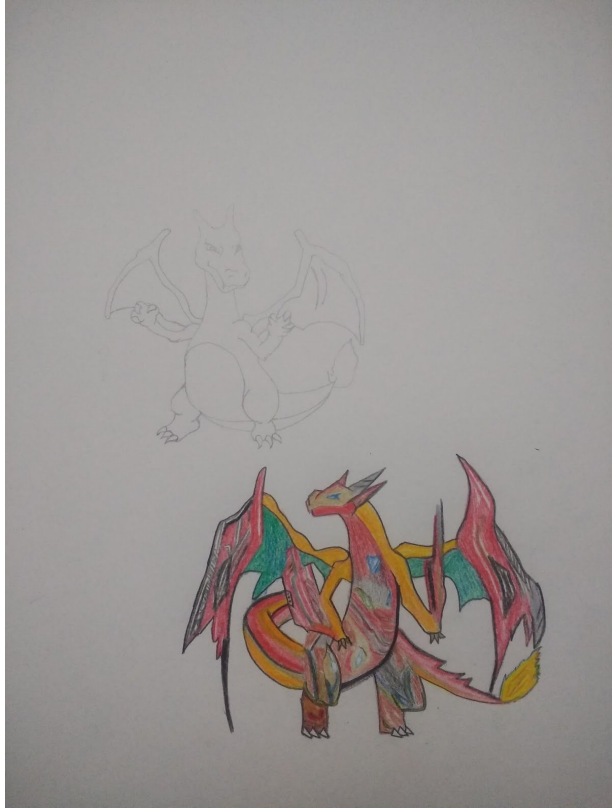

Once he has successfully received the stone, it would be inside the egg & one has to walk a certain distance to hatch the egg & to place the stone in the gauntlet. On acquiring the stones as the game progresses the power of Thanos would increase gradually & according to the stone.

## Stone vs Power :

<u>Stone</u>	<u>Power</u>
Power stone	Enhances the power of all the other

	stones
Space stone	Opens portals to other places
Reality stone	Alters the reality & stone owner can make everyone see what he wants to see
Soul stone	Essence of who you are, can control all lives. Thanos talks to Gamora at the end of infinity war using the soul stone
Time stone	Used to manipulate time, go back / forward in time & explore all possibilities.
Mind stone	Controls minds, merge minds

Here are some of the mashups we designed,

To be continued.....
